“60 Years of Space Exploration”
1957-2017
at the National and Kapodistrian University of Athens

Section of Astrophysics, Astronomy and Mechanics of the National and Kapodistrian University of Athens organized on Sunday 17 December 2017 a social event on the occasion of the celebration of the “60 years of space exploration”. This event is specially designed for all ages.

The event took place at the building of the Department of Physics. The activities were planned and organized under the guidance and supervision of faculty member Dr. Kosmas Gazeas, with the valuable contribution of undergraduate and graduate students. The event was a great success, as the turnout of visitors exceeded 500 persons.

The events consisted of:
- Observation of the Sun with telescopes and information about the phenomena of the solar photosphere and chromosphere.
- Lecture by Dr. Kosmas Gazeas entitled “60 years of space exploration”.
- “Control Room” interactive game, based on the idea of “Escape Room”.
- “Astropoly” interactive game, based on the idea of “Monopoly”
- Space quiz for everybody.
- Crafts, painting and constructions for kids.

The success of the event was primarily due to the devoted efforts of the following students:

Some snapshots of the event follow below.
