EUROPLANET SOCIETY
REGIONAL HUBS

The Europlanet Society Regional Hubs support the development of planetary science at a national and regional level, particularly in countries and areas that are currently under-represented within the community.

The Regional Hub Committees organise networking events and workshops to support the research community, and build links with amateur astronomers, industrial partners, policymakers, educators, the media and the wider public.

Europlanet Society members are welcome to participate in the activities of one or more Hubs.

The 10 Regional Hubs established to date are:

• Benelux
• Central Europe
• France
• Germany
• Ireland and UK
• Italy
• Northern Europe
• Portugal and Spain
• Southeast Europe
• Switzerland

The Europlanet Society Executive Office is hosted by the European Science Foundation (ESF) in Strasbourg, France. Established in 1974, the ESF is an independent, non-governmental, non-profit organisation committed to promoting the highest quality science in Europe.

Through Science Connect, its Expert Services division, ESF provides science-support services to its members, universities, and all types of research funding and performing organisations.

WHAT IS THE EUROPLANET SOCIETY?

The Europlanet Society is a membership organisation which actively promotes the advancement of planetary science and related fields in Europe.

The Society is open to individual and corporate members and builds on the heritage of 15 years of Europlanet projects funded by the European Commission.

OUR AIMS:

• To expand and support a diverse and inclusive planetary community across Europe through the activities of our 10 Regional Hubs
• To build the profile of our sector through outreach, education and policy activities
• To underpin the key role Europe plays in planetary science through developing links at a national and international level

The Europlanet Society organises the annual European Planetary Science Congress (EPSC), the largest annual meeting on planetary science in Europe.

CROSSPLANETARY PROJECTIONS

• Funding opportunities, calls and consortia
• Knowledge sharing, networking and promoting research
• Access to Europlanet resources, including virtual access services, tools, the Europlanet Media Centre and industry database
• Opportunities to promote your news and job information through Europlanet channels

Members Area

Access Europlanet Society’s exclusive website content, including strategic information relevant to planetary science, such as guides and digests for funding calls (e.g. from EU Horizon Europe programmes) as well as collaboration opportunities (e.g. calls for partners to form consortia).
