05:30-07:00 PM

EPEC General Assembly**

Conference
Rooms 1-2

Thu 5th Oct,
07:00 PM

Early Career Social Event

El Camino

**hybrid format

Early Career Networking Reception

Break the ice with your early career fellows! The reception is an informal gathering for early careers to get to know their fellows right at the beginning of the conference.

Mental Health in Planetary Science Short course by Steve Vance, JPL

The incidence of depression and anxiety in planetary science hasn't been well studied. Efforts are underway to remedy that dearth of information, and to promote recognition of the different ways people experience their worlds. This short course will describe those efforts and some recent results. Dr. Vance will also share his perspective and personal experience in planetary science in hopes of prompting discussion of how we might treat ourselves and our colleagues with greater empathy.

EPEC General Assembly

All early careers are encouraged to participate in the EPEC general assembly! At this assembly there will be an introduction to how EPEC is organized, an update on the past year's activities and the latest news. Join our friendly and inclusive community!

Early Career Social Event

Come and join us for the early career social event. This is a great opportunity to get to know (or catch up) with your fellow early career researchers. We will meet at El Camino, a bar and food truck park in San Antonio! It is a 25 mins walk from the conference center.
